Tutorials

- [Download Amazon Music with the App](#)
- [Download Amazon Music with the Web Player](#)
- [Additional Tools](#)

TuneCable iMazon Recorder supports both the Amazon Music app and the web player to work. In this part, we will show the two operations respectively. Additionally, we will show you how to use the additional tools with detailed steps.

Download Amazon Music with the App

Step 1. Sign in to Your Amazon Music Account

When you select the app mode to download Amazon Music, you are required to install the Amazon Music app on your computer. After selecting, the Amazon Music app is automatically launched. Sign in to your account to access the Amazon Music library. If you are already signed in, move forward to the next step.

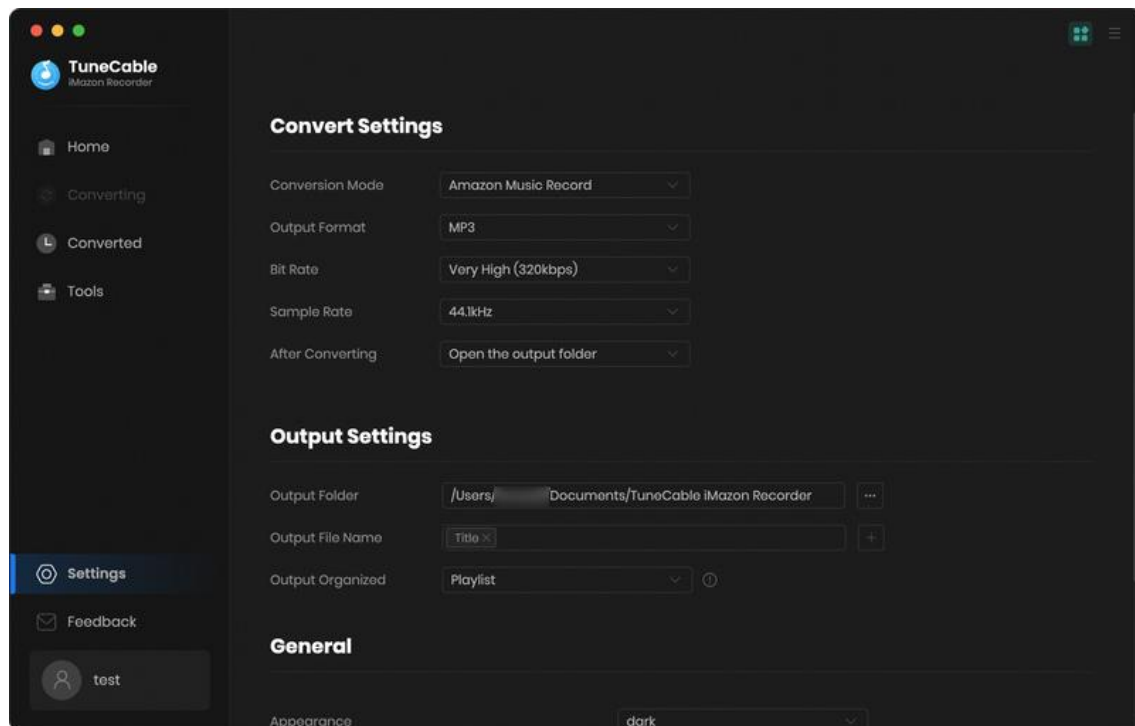

Step 2. Choose Output Settings

Click the “**Settings**” tab in the bottom left corner. Here you can choose the output format, output quality, output path, etc.

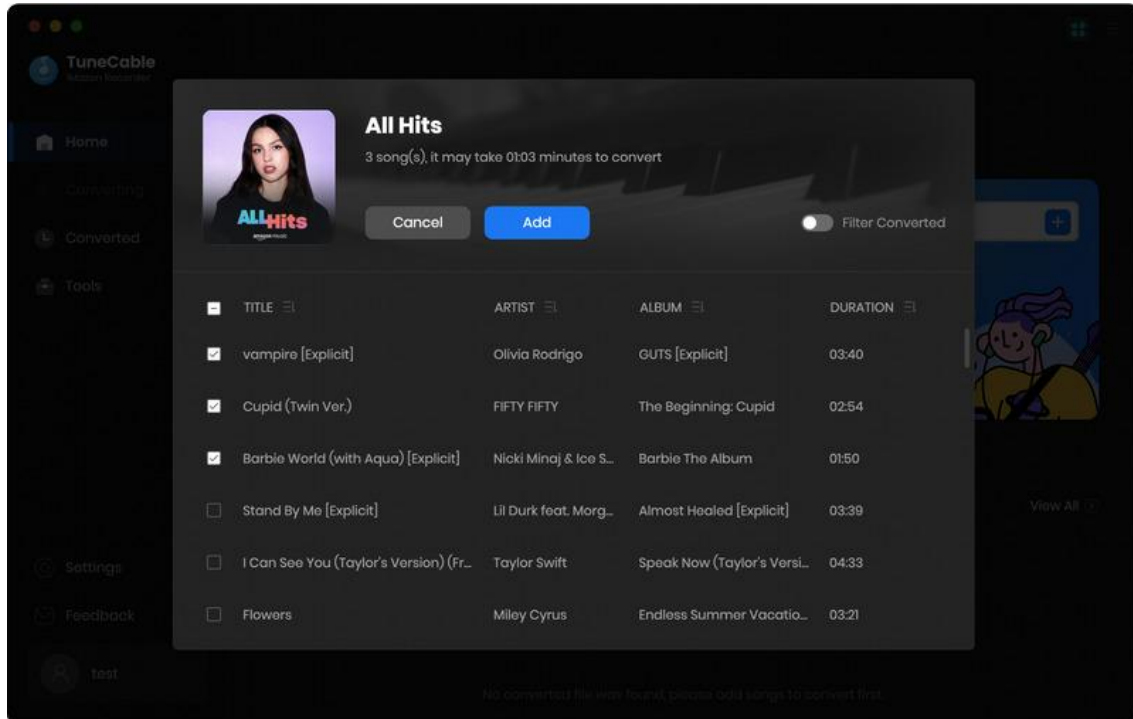

- ❖ Conversion Mode: Intelligent Mode, Amazon Music Record, YouTube Download
- ❖ Output Format: AUTO, MP3, AAC, FLAC, WAV, AIFF, ALAC
- ❖ Output Quality: 128kbps, 192kbps, 256kbps, 320kbps
- ❖ Sample Rate: 44.1kHz, 48kHz, 96kHz, 192kHz
- ❖ Output Folder: To your preference
- ❖ Output File Name: {Track Number} , {Title} , {Artist} , {Album} , {Year} , {Playlist Index}
- ❖ Output Organized: None, Playlist, Artist, Album, Artist/Album, Album/Artist, Playlist/Artist, Playlist/Album

If you select ‘AUTO’, TuneCable will output Amazon tracks with the source format and original quality (up to **Ultra HD**). When you are confused about the conversion mode, then select ‘Amazon Music Record’.

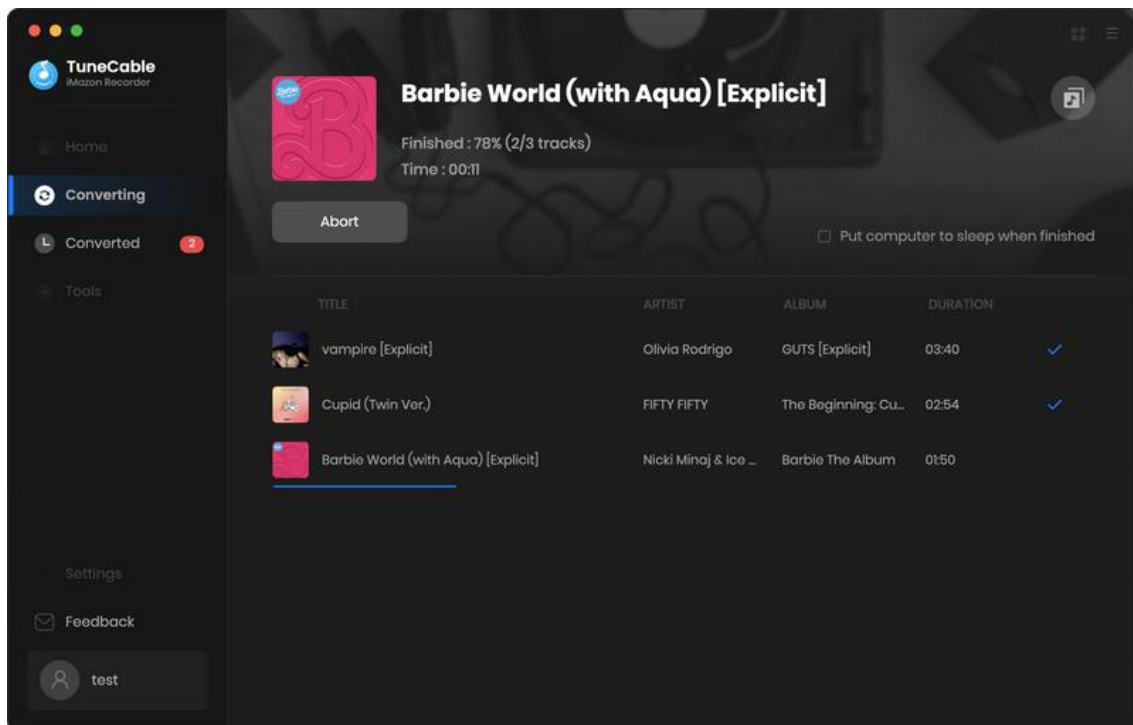

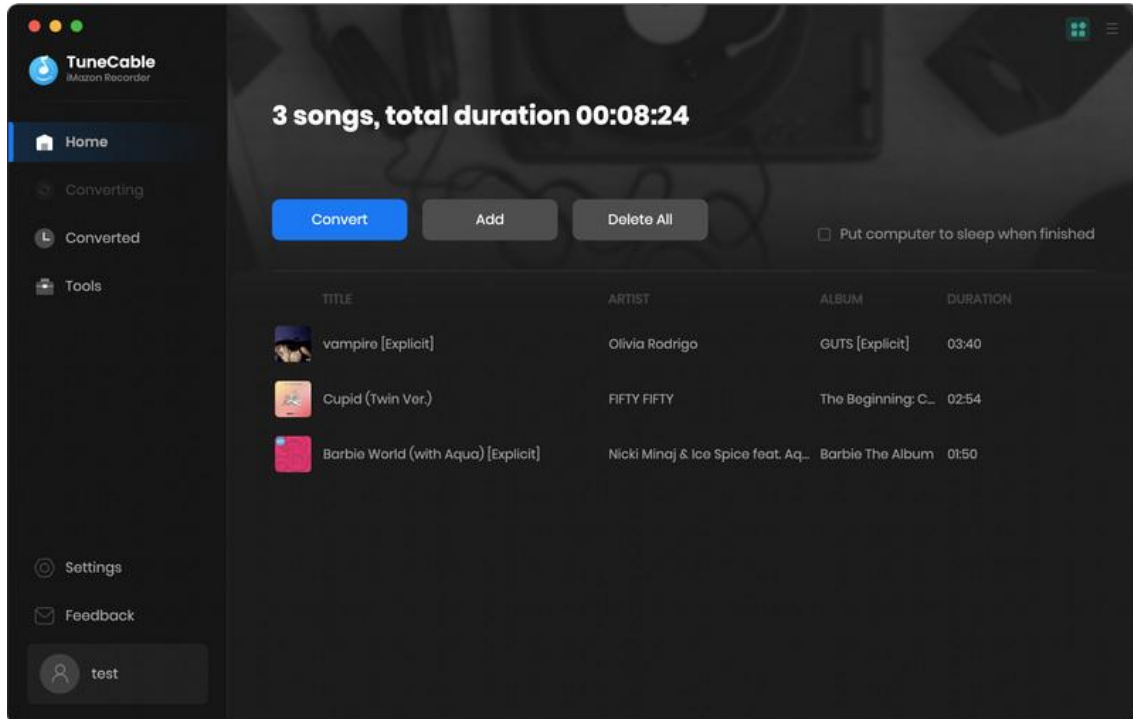

Step 3. Add Amazon Music Songs to Convert

Navigate to your target songs, albums, playlists, or podcasts on the Amazon Music app. Click on hold on to a title, drag & drop it to TuneCable. It will be parsed and the songs will be shown on a popup. Select the songs that you'd like to convert and then click **“Add”**.

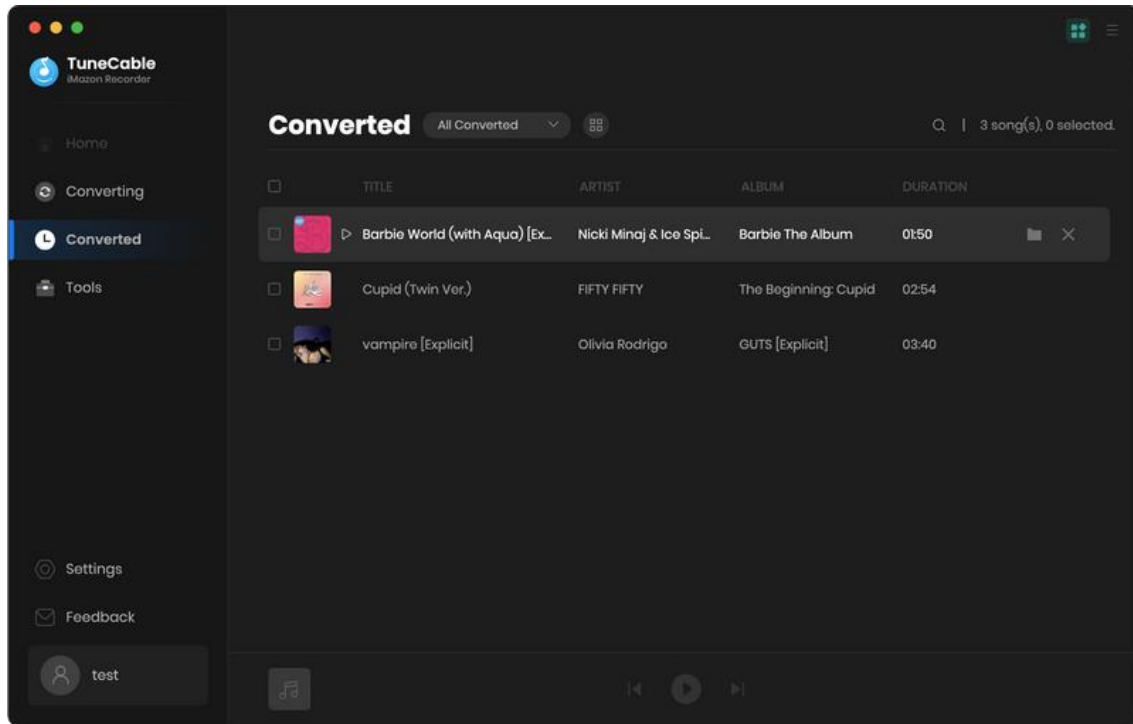

Step 4. Convert Amazon Music Files

After adding all the songs, you can export your Amazon Music to your local computer by clicking the “Convert” button, and TuneCable will proceed with the tracks at a fast speed. Soon they'll be all saved to the output path you set in the previous step on your local computer.

Step 5. Check Conversion History

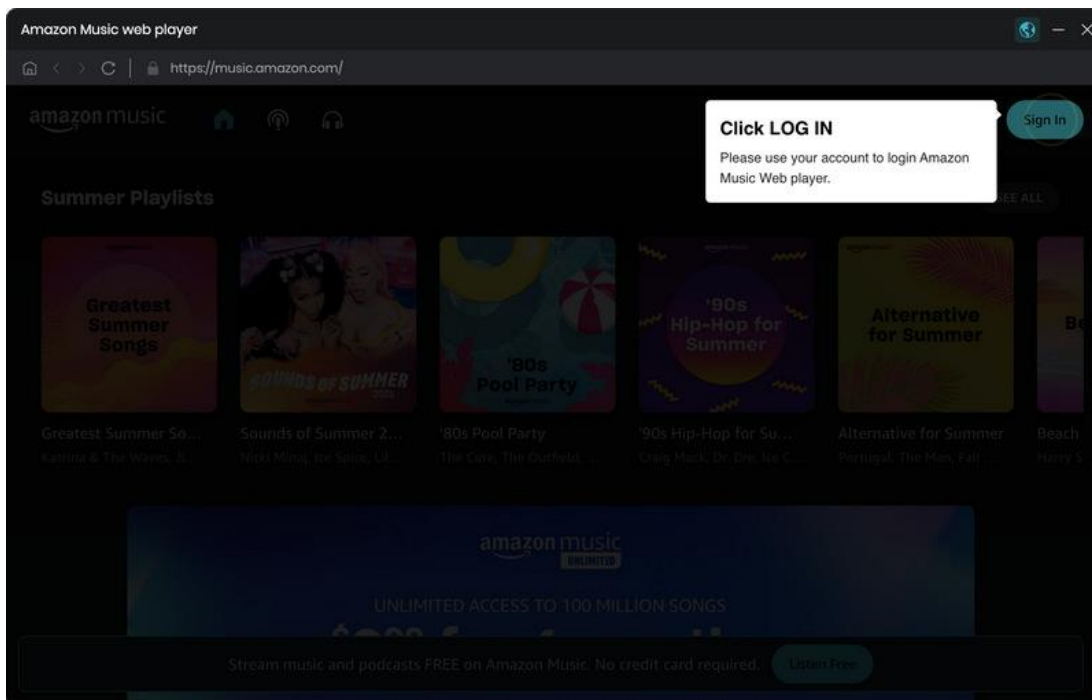

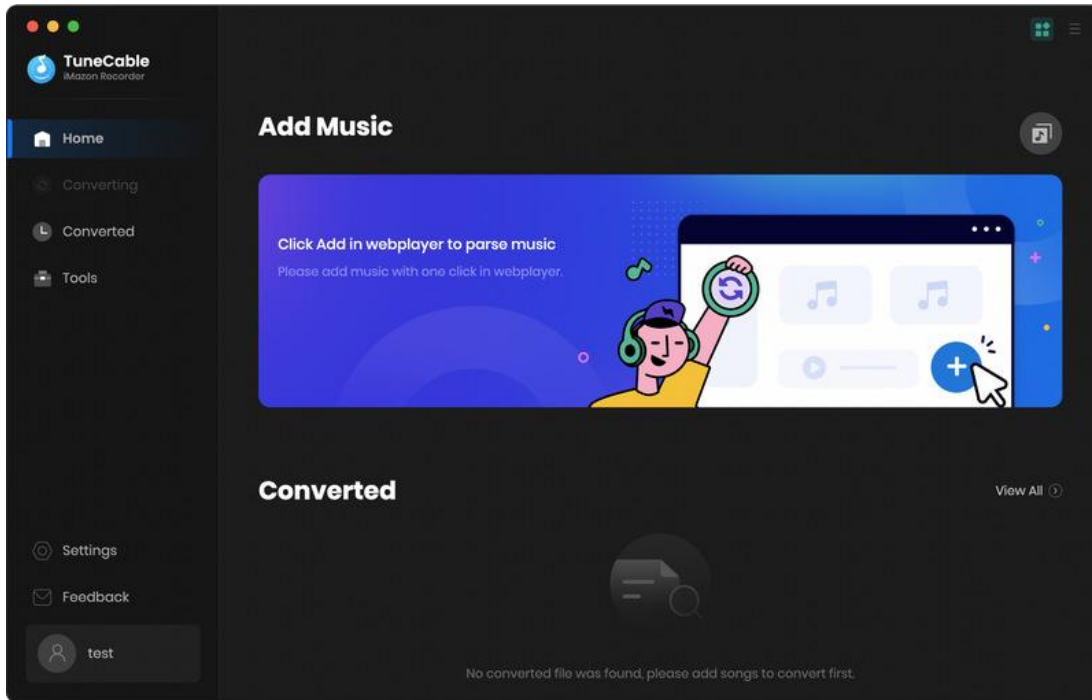

Once the conversion is done, you can find the downloaded Amazon Music by clicking the **“Converted”** tab or directly going to the output folder you customized in the previous step.

Download Amazon Music with the Web Player

Step 1. Sign in to Your Amazon Music Account

You can use the Amazon Music web player to download songs with TuneCable if you don't have an Amazon Music app. After selecting the web player mode, the Amazon Music web player will occur as a popup. You need to log in to your account to access the Amazon Music library.

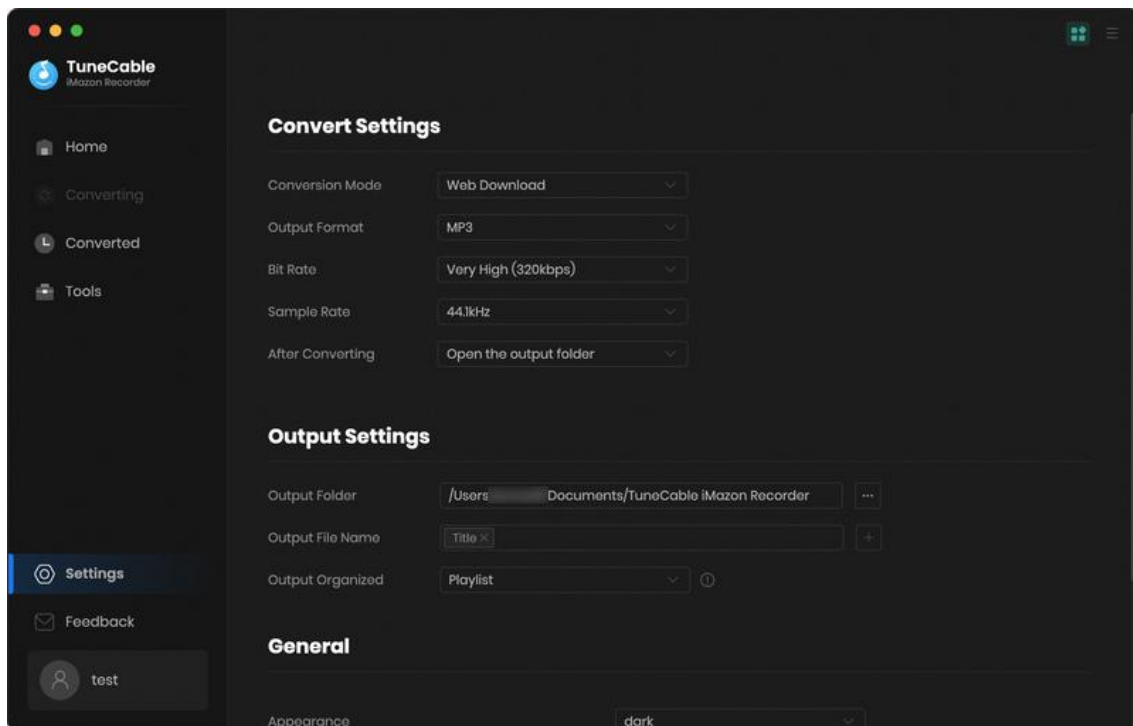

Step 2. Change Output Settings

To prepare for the downloading, go to the **“Settings”** panel to change output settings to your needs. TuneCable provides you with quite flexible settings and rich options. And you can make the following settings.

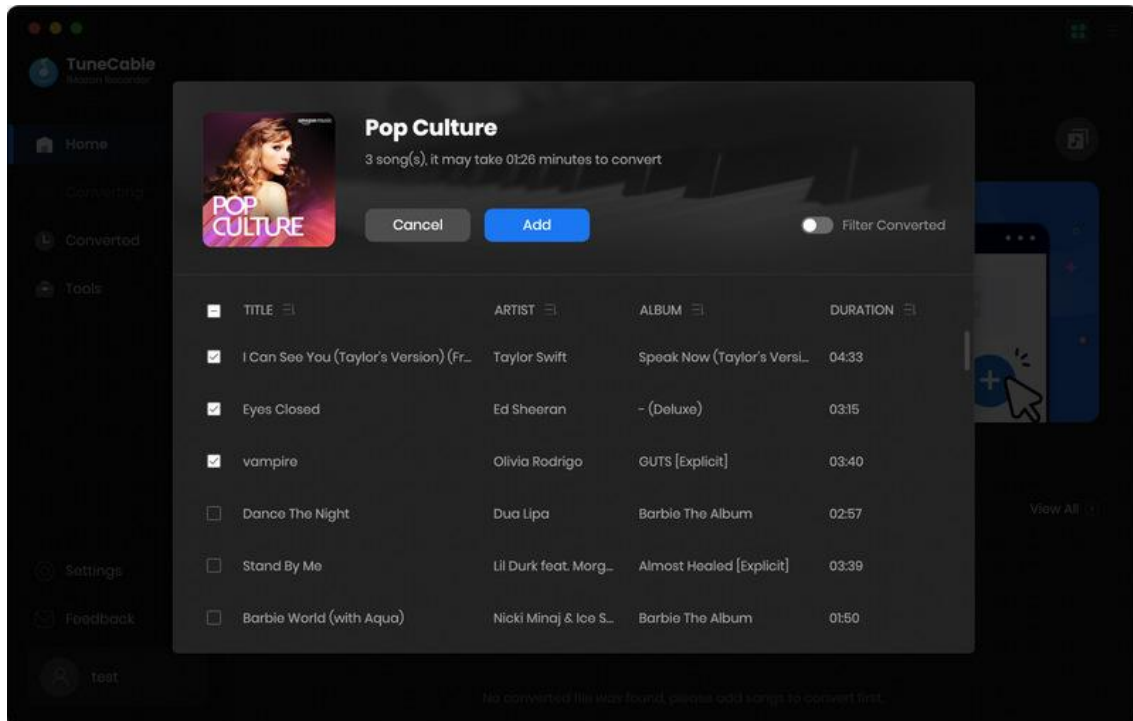

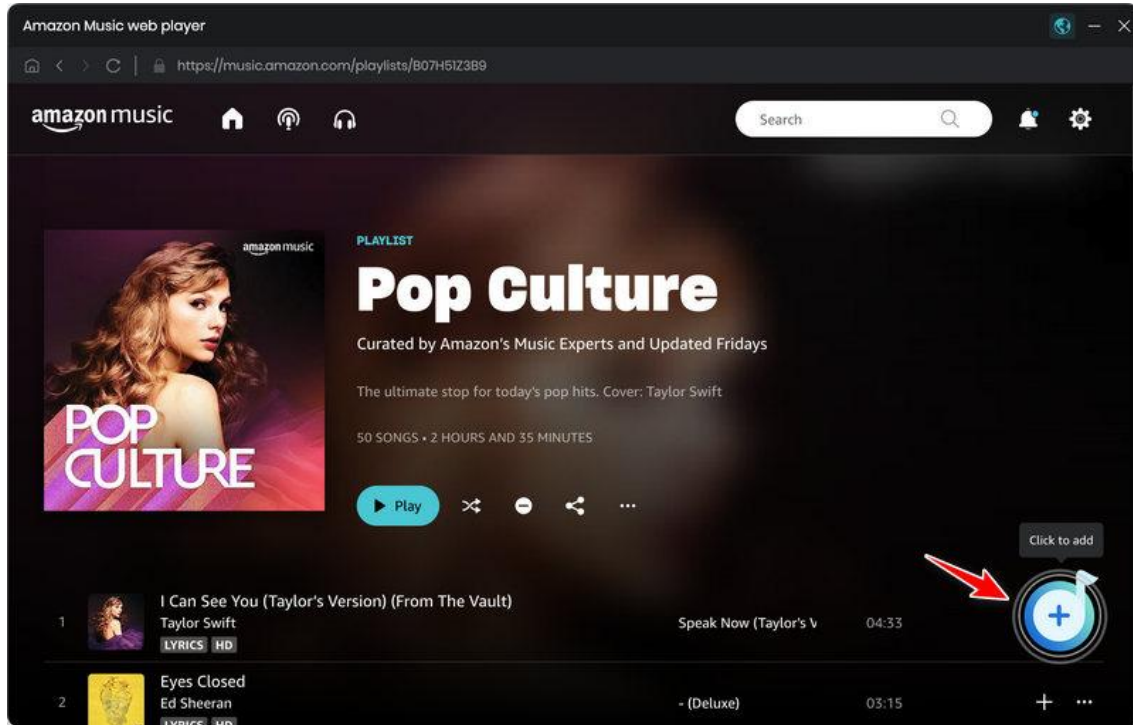

- ❖ Conversion Mode: Intelligent Mode, Web Download, YouTube Download
- ❖ Output Format: AUTO, MP3, AAC, FLAC, WAV, AIFF, ALAC
- ❖ Output Quality: 128kbps, 192kbps, 256kbps, 320kbps
- ❖ Sample Rate: 44.1kHz, 48kHz, 96kHz, 192kHz
- ❖ Output Folder: To your preference
- ❖ Output File Name: {Track Number} , {Title} , {Artist} , {Album} , {Year}, {Playlist Index}
- ❖ Output Organized: None, Playlist, Artist, Album, Artist/Album, Album/Artist, Playlist/Artist, Playlist/Album

If you prefer the output files to have the same format and sound quality (up to HD) as the original songs on Amazon Music web player, select 'AUTO' in the Output Format section.

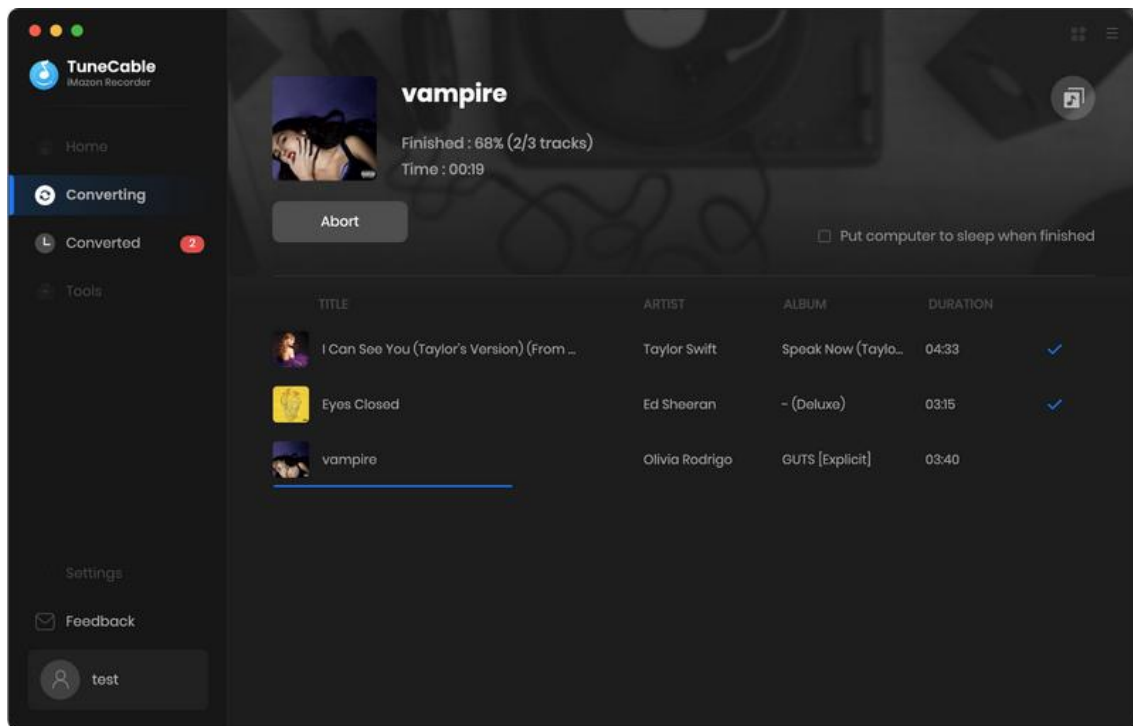

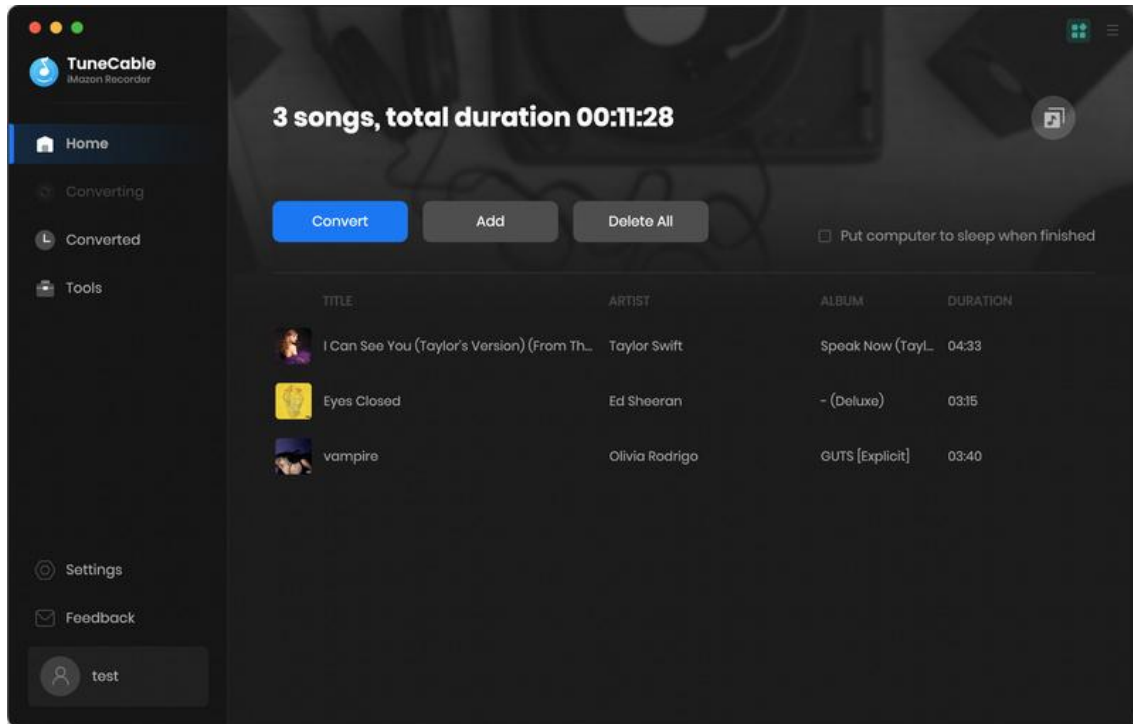

Step 3. Select Amazon Music Songs to Download

Browse the Amazon Music web player and open your favorite songs, albums, playlists, or podcasts. Click on the **“Click to add”** button in the bottom right. The available songs on the current page will be read and loaded on a popup. Pick your target songs and click on **“Add”**. If you’d like to add more songs, you may repeat this step.

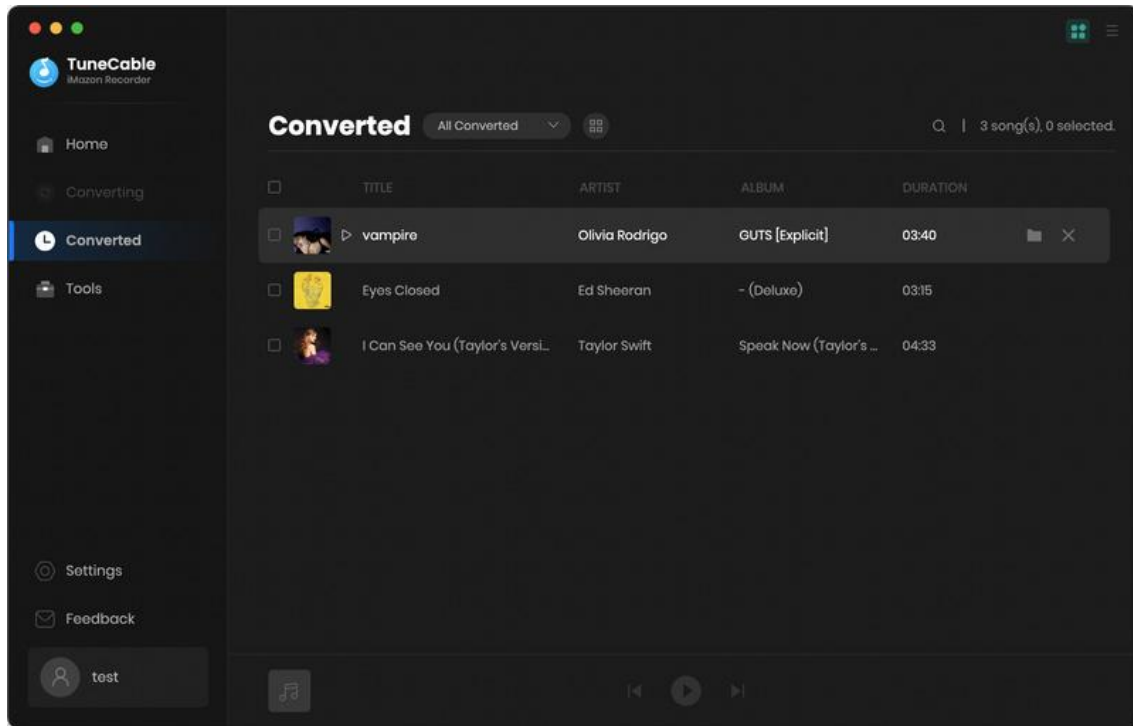

Step 4. Start Converting Amazon Music

After adding all your wanted songs, simply hit on **“Convert”**. The conversion will begin at once. Since TuneCable can run at 10x fast speed, and soon the conversion will be finished.

Step 5. Check Downloaded Amazon Music

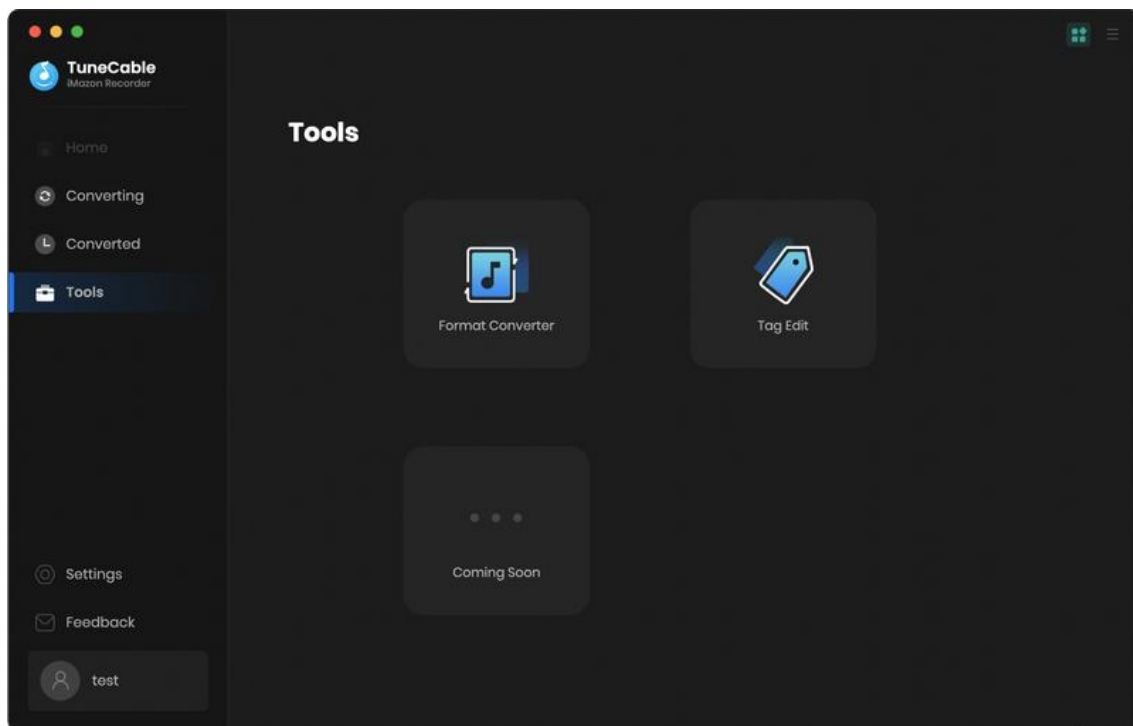

When the conversion is complete, you can go to the **“Converted”** column to check your download history. And you can go to the output folder by clicking the folder icon.

Additional Tools

- [1. Format Converter](#)
- [2. Tag Edit](#)
- [3. Export to iTunes](#)

TuneCable iMazon Recorder not only can convert Amazon Music to common formats, but also convert your local audio files to MP3/M4A/FLAC/WAV/OGG/AIFF. You can edit the ID3 tags if needed. Both functions are available in the **Tools** section. Besides, TuneCable allows you to export the converted Amazon Music songs to your iTunes library.

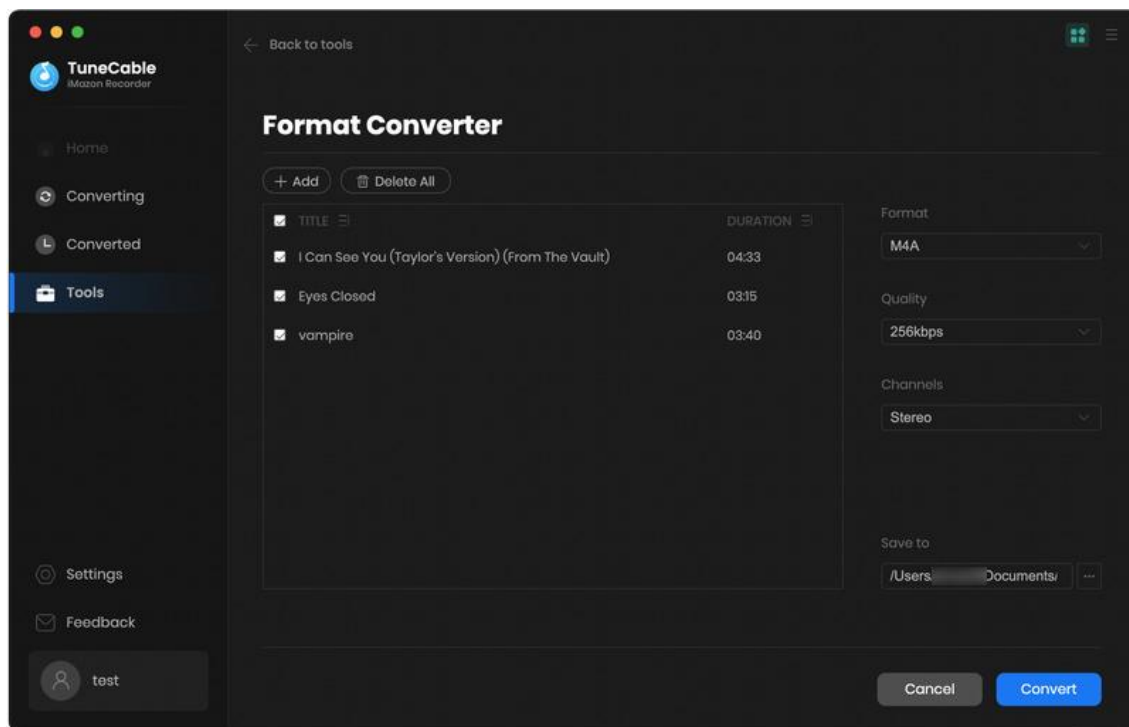

1. Format Converter

To give you the convenience to convert the formats of your local audio files and meet your needs, TuneCable develops the Format Converter tool. You can convert the files into **MP3, M4A, FLAC, WAV, OGG, and AIFF** formats. Additionally, you can output your local files with different sound qualities and channels.

Step 1. Open the Format Converter tool, and drag and drop your local files to TuneCable. You can also click on the “+Add” button to browse and open your local folder. The files should be MP3, M4A, M4B, WAV, FLAC, OGG, AIFF, or M4R format.

Step 2. After uploading your files, change the output quality, channel, and path as needed. Then hit on “Convert” to start converting formats.

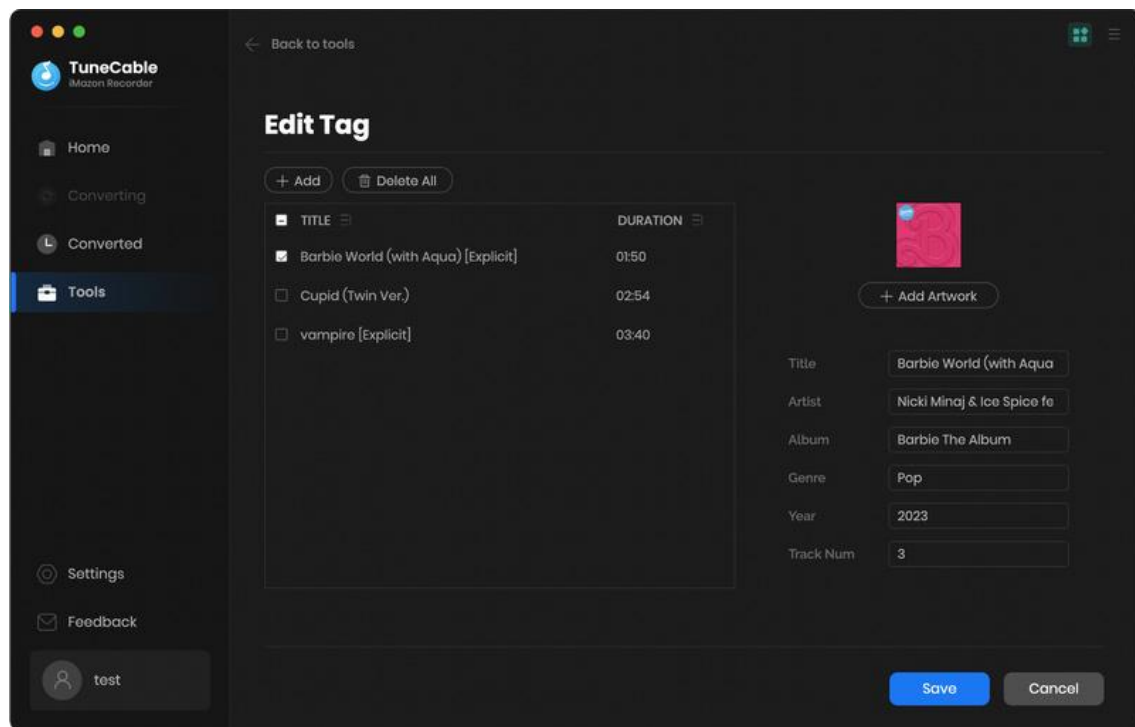

2. Tag Edit

Tag Edit comes to bring you the convenience to add ID3 tags to your local audio files or modify the tags, helping to recognize and manage your local files more easily.

Step 1. Open the Tag Edit tool on TuneCable. To upload the desired files, click the **"Add"** button or drag them right into the free space. If you would like to modify the ID3 tags of the converted Amazon songs, go to the "Converted" tab, select the target songs, and choose "Edit Tag" after clicking on the four-square icon above the songs.

Step 2. After uploading, TuneCable will smartly read and load the tags on the items. And you can add or change ID3 tags including **Artwork, Title, Artist, Album, Genre, Year, Track Number**, etc. Then click on **"Save"** to confirm the changes. You will see the modification on your local.

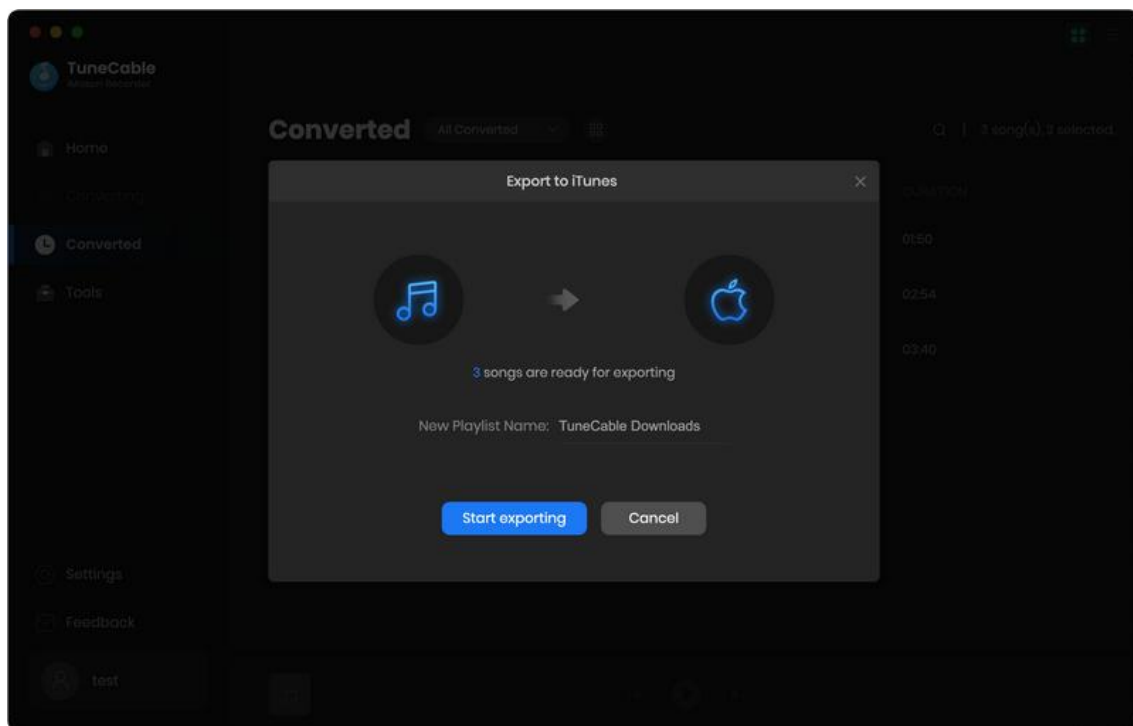

3. Export to iTunes

Apart from the previous two tools, TuneCable offers you the simple operation to export the converted Amazon Music songs to your iTunes. In this case, you don't have to find the output folder or import them to iTunes with redundant steps.

Step 1. After the conversion is complete, go to the "Converted" module, select your target songs, click on the four-square icon, and select "**Export to iTunes**".

Step 2. A popup will then occur. You can name this playlist as you wish. Next, click on the "**Start exporting**" button to begin the transfer.
